THE PERSON OF TAXABLE PARTICULAR OF THE

WHEN HE HAVE THE REAL PROPERTY.

SIR:-

I have the honour to submit for your approval the Sixtieth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1929.

I have the honour to be, Sir,

Your obedient servant,

Deputy Registrar-General.

To the Hon. Forbes Godfrey, Registrar-General of Ontario.

To His Honour the Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Sixtieth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1929.

Respectfully submitted,

FORBES GODFREY,

Registrar-General of Ontario.

CONTENTS

LIST OF VITAL STATISTICS TABLES FOR 1929 FOR PROVINCE OF ONTARIO

		GENERAL SUMMARY TABLES
TABLE	1	General summary of births, deaths and marriages in Ontario by county municipalities (including cities and towns), 1929
TABLE	1A	Number of births, deaths and marriages, and the ratio per 1,000 of population in each county (excluding cities and towns of 5,000 population and over), Ontario, 1929
TABLE	2	General summary of births, deaths and marriages in Ontario for cities, 1929
TABLE	2A	General summary of births, deaths and marriages for towns of 5,000 population and over, Ontario, 1929
TABLE	2B	General summary of births, deaths and marriages in Ontario, for towns of 1,000 population and under 5,000, 1929
		Births
TABLE	3	Births (exclusive of still-births) by months, classified as rural and urban for Ontario, by counties, 1929
TABLE	4	Total births (exclusive of still-births) and births in public institutions, showing the number of mothers non-resident in the province of Ontario, 1929
TABLE	5	Births (exclusive of still-births) to resident and non-resident mothers and births in public institutions in the cities and towns of Ontario, of 5,000 population and over, 1929
TABLE	6	Births (exclusive of still-births) classified as legitimate or illegitimate, and as single or plural by sex, for cities and towns of 5,000 and over, 1929.
TABLE	7	Births (exclusive of still-births) classified according to ages of parents, Ontario, 1929
TABLE	8	Births (exclusive of still-births) classified according to racial origin of parents, Ontario, 1929
TABLE	9	Legitimate births (exclusive of still-births) classified according to age and racial origin of mothers, Ontario, 1929
TABLE	10	Births (exclusive of still-births) classified according to birthplace of parents, Ontario, 1929
TABLE	11	Legitimate births (exclusive of still-births) classified according to age and birthplace of mother, Ontario, 1929

Births, Deaths and Marriages FOR THE YEAR 1929

The Sixtieth Report of the Registrar-General for the Province of Ontario, is herewith presented:

POPULATION

The estimated population is 3,271,000, distributed as follows:

City municipalities	or 42.56	per cent.
Towns (over 5,000 population)	or 6.57	per cent.
Rural (including all other municipalities)	or 50.87	per cent.

ESTIMATED POPULATION 1929 BY AGE GROUPS

	Males	Females	Totals
Totals	1,659,500	1,611,800	3,271,300

90 and over	531	580	1,110
oo and over	001	000	1,110

BIRTHS

	1929)		1928	
Numbe	r	Ratio	Number		Ratio
Province		20.9	68,510		21.2
Cities	3	23.3	31,602		23.6
Towns	3	29.2	5,939		27.8
Rural 29,699	2	17.8	30,969	,	18.4

Of the above, 35,154 were males and 33,304 females, giving a rate of 1,055 males to 1,000 females. The fluctuation in these proportions in a period of twenty years has been from 1,053 to 1,117, with no particular trend excepting in the five years. 1916 to 1920, when there was an increase in masculinity of from 1,063 males in 1916 to 1,117 males in 1920 to 1,000 females.

NUMBER OF BIRTHS AND RATE FOR 10 YEARS

Year	Number	Ratio	Year	Number	Ratio
1920	72,511	25.1	1925	70,122	22.6
1921	74,152	25.3		67,617	21.5
1922	71,320	23.9		67,671	21.2
1923	70,056	23.1		68,510	21.2
1924	71,510	23.3	1929	68,458	20.9

It will be immediately noted that there has been a decline in the birth rate from the high point (25.3) reached in 1921, and seems to be quite consonant with the birth rate in all other countries.

NATURAL INCREASE BY RATES PER 1,000 OF POPULATION

Birth Rate	Death Rate	Rate of Natural Increase	Birth Rate	Death Rate	Rate of Natural Increase
191022.4	12.5	9.9	192025.1	14.0	11.1
191122.2	12.6	9.6	192125.3	11.8	13.5
191222.9	12.5	10.4	192223.9	11.4	12.5
191322.7	13.1	9.6	192323.1	11.8	11.3
191425.0	12.2	12.8	192423.3	10.8	12.5
191524.9	12.3	12.6	192522.6	10.9	11.7
191623.9	13.0	10.9	192621.5	11.4	10.1
191722.6	12.0	10.6	192721.2	10.9	10.3
191823.0	15.3	7.7	192821.2	11.5	9.7
191922.0	11.9	10.1	192920.9	11.7	9.2

The largest natural increase during the past twenty years was in 1921, when there were 13.5 more births per 1,000 of population than deaths. A high rate was reached in 1914, the year war was declared and it gradually declined during the war years (for the rate in 1918 cannot be considered as at all normal, due to the tremendous number of deaths in that year from influenza). After the armistice and the men began to return the rate increased gradually until the high mark of 13.5 was reached in 1921. From this point a gradual decline is indicated until what might be considered a normal rate was again established. The rates in the last quinquennial of the period agree approximately with those in the first quinquennial.

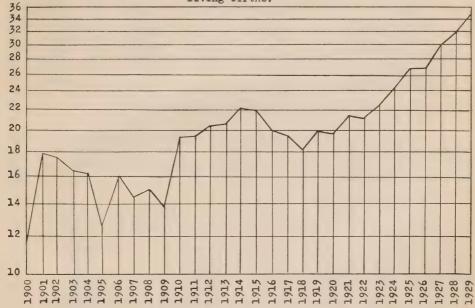

ILLEGITIMATE BIRTHS

Rate per 1,000 living births

190012.5	190814.9	191521.9	192221.2
190117.7	190913.7	191620.9	192322.5
190217.5	191019.3	191719.5	192424.2
	191119.4		
		191919.8	192626.9
	191321.6		
		192121.5	192831.7
190714.4			192934.7

The above table indicates a steady rise in the rates of illegitimacy in the Province. It has almost trebled in the 30 years shown in above table. The increase in 1929 over the rate of 1928 is the greatest in nineteen years. The admitted freedom exercised between the sexes during the last several years may in some measure be responsible. In the first decade shown above the increase was 9.5%. In the second decade the increase was 44.5%. In the third decade 75.2%.

STILL-BIRTHS

	Registered	Ratio per 1,000

MARRIAGES

	1929			1928	
Numbe	er	Ratio	Number		Ratio
Province	5	8.4	25,728	****	8.0
Cities	7	11.9	15,242		11.4
Towns	7	10.9	2,112		
Rural 8,64	1	5.2	8,374		4.9

See Tables 12 to 18.

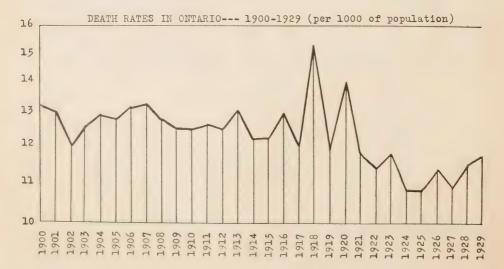

NUMBER AND RATIO PER 1,000 POPULATION FOR 10 YEARS

Year	Marriages	Ratio	Year	Marriages	Ratio
1920	29,104	10.0	1925	23,074	7.4
1921	24,871	8.5	1926	23,632	7.5
1922	23,360	7.8	1927	24,677	7.7
1923	24,842	8.2	1928	25,728	8.0
1924	24,038	7.8	1929	27,605	8.4

The marriage rate remains fairly steady, the fluctuations from year to year being comparatively small and showing no decided trend to rise or decline.

DEATHS

(j) I	Bright's disease	979			1,193						
/1 \ T		33.8			39.4		46.2			53.9	
(k) I	Diphtheria		$\frac{653}{22.2}$								

The above table shows the ten highest causes of death and these account for 25,587 of all deaths, or 67.2%. Increased rates are indicated in four, viz.: Organic Heart Diseases, Influenza, Diseases of the Arteries, and Infantile Diarrhoea. Decreases occurred in Pneumonia, Tuberculosis, Cancer, Accidental and other external causes, and Apoplexy, and no change worth noting in the rate of Bright's Disease.

There is indicated a slight decline in the death rate from Cancer this year. In 1928, it was 106.5, and this year is 104.0 per 100,000 of population. The last drop was in 1925, when it fell 1.1 in the hundred thousand and there is no reason to believe that the drop this year will be maintained. There are fluctuations in the rate of each type of cancer classification, the greatest of which is in cancer of the stomach. Here the decline is 2.5, agreeing with the decline in the whole class. This is a drop of 2.5 in the rate.

Tuberculosis is down to eighth place and is at the lowest point ever reached. The rate is 52.0 per 100,000 of population and is 9% of a decline. The rate for 1929 was only two-thirds the rate of 1919, a reduction of 50%. This is substantial evidence proving the benefit derived from the efforts put forward by health authorities to exterminate the White Plague, as it was at one time popularly known.

INFANT MORTALITY

DEATHS OF CHILDREN UNDER ONE YEAR-PRINCIPAL CAUSES OF DEATH

(A) TOTAL DEATHS

CANCER

There were 39 fewer deaths from cancer in 1929 which, with the normal increase in population, brought the death rate down by 2.5. This, while not the first decline in the rate, it is the first time since 1918 that the actual number of deaths reported has been lower.

Table showing the distribution of deaths from various types according to class and rates per 100,000 of population as follows:—

	19	20	19	21	19	22	19	23	19	24	19)25	19	26	19	27	19	928	19	929

The number of deaths from puerperal causes was 368, being 28 fewer than in 1928. The rate was 51.8 per 1,000 total births (including still-births). The rate per 1,000 living births was 53.7.

Table— Deaths of women not classified to pregnancy or child-bearing but returned as associated therewith, Ontario, 1929:

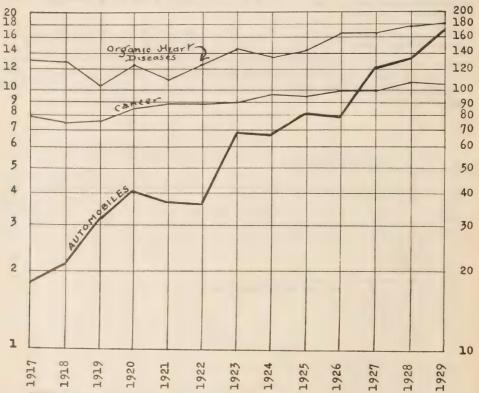

Int. List	
No.	Causes of Death
	All causes
7	Measles
11	Influenza
21	Ervsipelas
31	Tuberculosis of the respiratory system.
45	Cancer of the peritoneum, intestines and rectum
58a	Pernicious anaemia
60a	Exophthalmic goiter
70a	Abscess of brain
78	Epilepsy
81	Chorea
84	Other diseases of the nervous system
88a	Acute endocarditis
9.0a	Valvular disease
90d	Chronic endocarditis.
90e	Chronic myocarditis
90f	Other diseases of the heart
92	Embolism and thrombosis (not cerebral)
100a	Broncho-pneumonia
101a	Lobar pneumonia
101b	Pneumonia—not otherwise defined
102	Pleurisy
109b	Diseases of the pharynx and tonsils
111a	Ulcer of the stomach
117	Appendicitis and typhlitis.
120	Acute yellow atrophy of the liver
129	Chronic nephritis (including unspecified, 10 years of age or over)
131	Other diseases of the kidneys and annexa
199	Homicide

DEATHS FROM EXTERNAL CAUSES

The following Table shows the chief causes of accidental deaths, and rate per 100,000 of population:

	1	920		1921		1922		1923	1	924		1	925		1926	1	1927	1	.928	1	929

Death rates from automobiles, per 100,000 population.

LEFT index for automobile death rates

RIGHT index for organic Heart and cancer death rates.

The above graph shows the death rates from automotive accidents compared with the rates from deaths from organic heart diseases and cancer.

For years it has been an appalling fact that these two causes have been responsible for a very large proportion of deaths (between 24% and 25% of all deaths) in our province and with a steadily increasing rate.

Although deaths from automotive vehicles have been few in number when compared with the huge totals piled up by cancer, organic heart, or tuberculosis, and the rates consequently lower, the fact is that the rate of deaths from automotive accidents is increasing by leaps and bounds.

Table 1—General Summary of Births, Deaths and Marriages in Ontario by County Municipalities (including Cities and Towns), 1929.
